

Please do not let the NAB lobbyist persuade you to make a decision that would keep XM Satellite radio from broadcasting weather and traffic. I travel as part of my job and I cannot possibly try to remember which station in which area will eventually give a traffic report or weather update.

Xm satellite radio should be allowed to select a format that thier viewers want just like any other radio station.

Please don't let high dollar lobbyists dictate a decison that is supported by a wealthy minority opinion. Lobbyist ruin everything else please let space be the final frontier that they cannot wreck.

Respectfully

Scott M. Kiser
